RESEARCH SKILLS AND RELEVANT EXPERTISE

Probability Course (R): This course provided me with a deep understanding of probability theory and its applications, using R for statistical analysis and simulations.

Data Mining Course (Python): I developed practical skills in data mining techniques, including machine learning algorithms, using Python.

Econometric and Causal Inference Course (Stata): In this course, I focused on econometric modeling and causal inference methods, applying these techniques using Stata. Currently, I am utilizing Stata for a school paper on the causal inference of the working-from-home ratio on property prices. This project involves advanced econometric analysis to evaluate the impact of remote work trends on real estate markets.

PROFESSIONAL EXPERIENCE

US Dollar Fund (GP: Fosun International)

Shanghai & Hong Kong SAR, CN
